

Clarijs

Bike Bags and
Cargo Bike Covers

Handmade
since 1948

Our History

Zeilmakerij Clarijs is a traditional family business officially founded in 1948 by the brothers Clarijs and started as a saddlery.

When the demand for leather products decreased, Clarijs started to focus more on processing sailcloth and related products.

The company has passed on to the sons and grandchildren and in recent years has grown more in production work of, among other things, (bike) bags and covers for cargo bikes. Which are now sold in more than 12 countries, including Canada and the United States.

Sustainability

We re-use cut-outs for sewing bags from that valuable piece.

Almost all materials we use come from the EU. We make everything by hand in the EU and to a large extent with people from the sheltered workshop.

In recent years we have been selling more and more (bike) bags made of recycled truck cloth, production waste and other used materials.

Our new SoloBag, VarioBag and Backpack are made from 100% waste of our production of the cargobike canopies from Urban Arrow, Babboe, Johnny Loco, Butchers and Bicycles and many more brands.

SoloBag

FIDLOCK®

The [Recycled] Solobag
This portable bike bag is made out of production waste from our cargo bike rain covers. The materials we use are coated acryl and PVC.

Size	Width	Depth	Height
24 Liter	31cm	19cm	44cm
Distance hooks until bottom 34cm

easy closing.

Double Pannier

All panniers from this collection are handmade. The lid of these bags is equipped with rain flaps to prevent incoming rain. Together, the rain flaps and PVC fabric create an extremely water resistant pannier. All panniers have reflection on the front and rear for better visibility in dark or misty weather circumstances. Both the back and bottom of the panniers are reinforced with strong plates made from recycled plastic. The closures are made of a high-quality flexible material, attached to the bag with a flexible PP strap.

Print Collection

Materials

PVC

Printing

All Clarijs prints are digitally printed on Solidskin curtains, normally used for trucks. Printed Solidskin curtains with special PU-coating are known to possess the best quality in the field of printed trucks.

Thanks to the special PU-coating, the prints last years without fading or losing color. The coating controls the adhesion of the inks, makes the surface dirt-repellent and resistant to UV light. This all contributes to a long term preservation of the print.

Double Pannier Features

Anti-theft Ring

This option provides protection for your pannier against theft. It enables the use of a padlock.

⊕ OPTIONAL

U-Bracket

The U-Bracket prevents your pannier from making contact with your spokes. It also makes your pannier extra sturdy.

Only available for the XL & XXL Version.

⊕ OPTIONAL

Square Recess

This extra option enables the use of straps or the mounting of a child safety seat on your luggage carrier.

⊕ OPTIONAL

Shoppers

All Shoppers in this collection are handmade and available in sizes L and XL. They are specially tailored to fit exactly in our double panniers and are matchable in color, material and print.

FrontBag

The Front bag is a handmade multi-functional bike bag, specially made for handlebar racks. It has handles attached to the top and comes with a detachable shoulder strap, just like the Clarijs Solobag. This makes the bag

very handy for multiple purposes. The closure system of the Front bag is implemented with a magnetic strap, which makes it incredibly easy to open and close, perfectly fitted for doing groceries or shopping. The bottom and sides are reinforced with recycled plastic plates for extra sturdiness.

SideWalkers

The Sidewalker is a simple portable bike bag, perfectly fit for going to work or school with your bike. On the backside there are two hooks attached which make it incredibly easy to detach the

back from your luggage carrier and super easy to click it on again. The Sidewalker is available in two different materials, PVC Bisonyl and Excellent (coated acrylic)

Cargo Bike Covers

Bakfiets.nl Cabrio

Clarijs designed the original cargo bike cover for these cargo bikes in 2001.

This rain-tent is equipped with one zipper on each side along the windows. The zippers enable the window to be taken down in nice weather circumstances or when loading the cargo area. This system allows the cover to always remain on the cargo bike.

The Cabrio rain covers are available in three different sizes: Short, Long and Long-high.

Bakfiets.nl Box Cover 2.0

Clarijs designed the original cargo bike cover for these cargo bikes in 2001.

This improved version of the Clarijs box cover has a batten in the middle which creates a bulge and prevents water from remaining on the cover.

The 2.0 Cover is available in two different sizes, Short and Long.

Bakfiets.nl UP

Clarijs designed the original cargo bike cover for these cargo bikes in 2001.

Unlike the Cabrio model, the UP version is equipped with two zippers on each side, which enables the window to be rolled UP in nice weather circumstances or when loading the cargo area. This system allows the cover to always remain on the cargo bike.

The UP rain covers are available in three different sizes: Short, Long and Long-high.

Our Materials

Coated Acrylic

A very strong coated acrylic fabric, which is also used for water sports and is therefore even resistant to saltwater. This fabric has two different coatings, a water resistant coating and a special UV coating. The UV coating ensures that the material does not lose it's color, even after years the color remains intact.

This material is produced in the EU (Spain) from solution dyed acrylic yarn with a very high color fastness. A really beautiful product with a very chic look.

Rivertext®

A woven nylon with a special PVC coating. This material is flexible, strong and of course completely water resistant. The cover is equipped with high quality water resistant zippers, with a 10mm thickness.

PVC

Bisonyl PVC fabric, also used for the coating of trucks. The fabric is incredibly strong, water resistant, colorfast and resistant to extreme heat and cold.
